**Requirements for establishing a COVID 19 Level II care centre at Base Hospital Bibile**

Base Hospital Bibile is currently developing to a level II care centre to cater the increasing numbers of COVID 19 positive cases in Monaragala district. Base hospital Bibile is the only centre available in the district which has the potential to establish as a level II COVID 19 care centre. Meanwhile DGH Monaragala will be developed as a Level III care centre where more critical COVID patients are managed.

Though we planned our services to cater upcoming surge of patients, we are experiencing great deal of troubles in getting adequate machinery and supplies. Currently we do not have a single high flow oxygen machine in the hospital and patients are managed only with low flow oxygen.

I came to know that your good office is offering assistance to overcome these difficulties where it is most needed. I would be much grateful to you, if you can provide us two AIRVO2 high low machines with accessories to save lives of COVID patients.

Your kind cooperation in this regard is highly appreciated.
