Dear Sir

**Request for BiPAP machines for COVID patients at Teaching Hospital Karapitiya (THK)**

With the unexpected surge of COVID patients during the current third wave THK, as the tertiary referral centre of the Southern Province had to expand the capacity to handle increasing number of critically ill patients

We provide Level 2 and Level 3 care and most of our admissions need oxygen either via simple masks or via breathing support devices such as BiPAP or HFNO machines.

In keeping with this objective we are transforming a fourteen bedded new High Dependency Unit (HDU) within the hospital to provide better care and close monitoring.

I would be grateful if you could provide us **BiPAP machines** for the use of critically ill COVID patients

I would like to thank your generosity and hopeful that you would extend your support in our future endeavours to save more lives.

Yours Sincerely

Dr Shelton Perera  
Director/TH Karapitiya
